RBI, in its Annual Monetary Policy for 2013-14, reduced the repo rate by 25bps to 7.25%. The Cash Reserve Ratio (CRR) was left unchanged. The policy action undertaken in this review carries forward the measures put in place since January 2012 - of supporting growth in the face of gradual moderation in headline inflation. The three broad contours of the RBI's monetary policy stance are (i) to continue addressing accentuated risks to growth (ii) guard against the risk of inflation resurgence and (iii) manage liquidity to ensure adequate credit flow.

The RBI estimate of FY2014 GDP growth is 5.7%. With predictions of a normal monsoon this year expected to contribute to agricultural growth and major infra and oil and gas projects getting clearances from cabinet committee on investment, the GDP growth should gradually recover. RBI expects inflation to be range-bound with a March 2014 target of 5.5%. The indicative growth for M3 has been kept at 13% YoY, deposit growth at 14% YoY and non-food credit growth at 15% YoY.

Many of the macro indicators are showing signs of improvement. February IIP recorded a mild expansion at 0.6%, surprising positively. Manufacturing growth expanded by 2.2% as growth in capital goods rose 9.5% after 3 months of contraction. Consumer durables growth dropped as consumption slowed down. The March WPI reading came in at a 4 year low of 5.9% and core inflation continued to ease, falling to 3.5%. The CPI can also be expected to fall in FY14 as the MSP hike proposals at 5% for the Kharif crops are much lower than the 23.5% increase in FY13 and 11.5% in FY12. With a weak outlook on global commodities and a correction in precious metal prices, India's CAD should show signs of improving.

The Cabinet Committee on Investment, set up in January, has given its nod to large projects worth Rs.100, 000 crores in the Oil and Power sectors in the last 4 months. These projects, which were stuck for years due to lack of various clearances, will give a much needed push to infrastructure growth. Parliament resumed its budget session and bills related to Food Security, Finance, Insurance and Pension are expected to be tabled. The Finance Bill was passed with amendments, including the much-awaited cut in withholding tax on foreign investments in debt to 5% from 20% and the acceptance of the Tax Residency Certificate as a sufficient document for residency proof for overseas investors.

Market Outlook

Key Indices	30-Apr-13	31-Mar-13	% Change
10 year G-Sec	7.73%	7.96%	-2.98%
5 Year G-Sec	7.55%	7.96%	-5.43%
91 Day T Bill	7.56%	8.02%	-6.08%

MIBOR	8.34%	9.63%	-15.47%
Call Rates	7.55%	7.81%	-3.44%

Equity Outlook:

Indian equities had a strong performance in April 2013 with the BSE Sensex gaining 3.5% and making a five month high. Global investor confidence has improved as the domestic macro-economic situation has changed for the better. The FII flows continued and the net inflows at \$1.2bn in April have taken the FII CYTD net purchases of equity to \$11.5bn. On the other hand, DIIs remain net sellers to the tune of \$500mn with the CYTD net outflow at \$6.8bn.

The sustainability of the equity will depend on future commodity price trends and continued FII flows. The equity market's short to medium term direction would also depend on government's continued focus on domestic policy actions despite political uncertainty. Valuations at 14x FY14e earnings are quite attractive for long term investors as the economy has already seen its worst in terms of economic data.

Debt Outlook:

The bond markets saw a good amount of softening in the days before the RBI policy. The market participants had expected a bigger rate cut and some further steps from RBI to improve liquidity but RBI took only moderate policy action. The Gsec yields dipped to as low as 7.68% before retracting to 7.75% on the day of the policy. Corporate bonds have also seen a good amount of trading in view of shortage in primary supply and also the government's move to cut the FII withholding tax from 20% to 5% making investment in bonds and debt instrument lucrative for FIIs. We believe RBI would be inclined to ease rates by a further 50 bps in FY14 if fiscal consolidation proceeds as expected and WPI eases.

RBI's slightly hawkish view in the recent monetary policy coupled with a negative liquidity of Rs. 50 lakh crores has kept the markets confused. We expect the benchmark 10 year government yield to trade in the range of 7.60% to 7.70%. Corporate bonds will continue to trade with a narrow spread of 65 bps to the government bond as there are no large issuances expected in the near term.

About the Fund

Objective: The Objective of the fund is to provide blend of fixed return by investing in debt & money market instruments and capital appreciation by predominantly investing in equities of fundamentally strong and large blue chip companies.

Strategy: The Strategy of the fund is to build and actively manage a well-diversified equity portfolio of value & growth driven stocks by following a research-focused investment approach. While appreciating the high risk associated with equities, the fund would attempt to maximize the risk-return pay-off for the long-term advantage of the policyholders. The non-equity portion of the fund will be invested in high rated debt and money market instruments and fixed deposits.
