## HOW DOES THE PLAN WORK

Some benefits are guaranteed and some benefits are variable with bonuses based on the future performance of the participating business and economic conditions. If your policy offers guaranteed returns then these will be clearly marked "guaranteed" in the illustration table on this page. If your policy offers variable returns then the illustrations on this page will show two different rates of assumed future investment returns. These assumed rates of return are not guaranteed and they are not the upper or lower limits of what you might get back as the value of your policy is dependent on a number of factors including future investment performance. In the illustration below, the Sum Assured is fully guaranteed. The Total Death Benefit is not guaranteed and is determined using assumed future investment returns of 4% and 8% as set by the Life Insurance Council.
