1. Brief details on valuation data covering its accuracy, completeness and reasonableness and how the data flows to the valuation system

A. Completeness and Reasonableness checks

All policy details are extracted from Ingevium, our policy administration system. The information extracted includes policy identification, coverage type, date of commencement, date of birth, gender, plan type, investment option, policy term, premium paying period, premium frequency, sum assured, modal premium, extra premium, fund value (applicable for unit linked business), status etc. The data for Group business is extracted from Compass and Gradatim which are the policy administration system for group business.

b. Checks for Data completeness/accuracy/reasonableness include:

- For Linked business, the number of units from valuation data is equal to units from Investment Data.
- Number of new business records reconciled with those from alternate source.
- The last policy number in the valuation data is cross-checked with an independent source.
- All linked policies should have fund option.
- No policy has unidentified product code.
- RPV sum assured is correctly calculated for Paid-Up policies.
- No matured policies should appear as Inforce.
- Reasonableness checks based on average policy term, average premium term, average outstanding term, average age, average premium and average benefit.
- Changes in demographics like Age, Gender, Term, etc.

B. Data flowing into Valuation system.

- a. A set of DCS codes are run to convert each input data into Prophet readable format (Model point files).
- b. All model point files from previous step are linked into the Prophet models. Prophet models are run as an valuation date.

2. Brief mention of any significant change in the valuation basis and /or methodology

There have been no changes to valuation basis and/or methods.
